This is the fourth office action for application number 10/622,605, Adjustable Bimini Bracket, filed on July 18, 2003.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the primary reasons for the allowance of the claims in this application are the limitations of an adjustable bimini bracket for use in connection with a boat having a railing tubular member, the railing tubular member having a central axis and a generally rectangular cross-section, and a bimini having a plurality of strut tubular member each having a central axis and a generally rectangular cross-section, the bracket having a left side plate and a right side plate, the side plates being generally flat, generally parallel and spaced apart, a transverse plate extending between the side plates intermediate the first and second ends, the trans plate being generally flat, a left ridge on the left plate inner surface and a right ridge on the right plate inner surface, the left and right ridges being parallel to the central axis, the left plate inner surface, the right plate inner surface, the transverse plate, and the left and right ridges defining a generally rectangular cross-sectional cavity for allowing the bimini bracket to slide in an axial direction along the tubular member between the side plates and between the transverse plate and the ridges, while preventing the bimini bracket from rotating about the central axis, now included in independent claim 12 and in combination with the other elements recited in the claim, which is not found in the prior art of record.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
